

BUILD EASIER.

What Is ZIP System® Roof & Wall?

ZIP System® structural roof and wall panels with built-in protective barriers and the specially designed ZIP System™ tape let you say good-bye to housewrap and felt forever. Simply install the panels, tape the seams and you're done!

The ZIP System Includes:

ZIP System panels with built-in barriers

- ZIP System® roof panels with built-in **Precipitek** moisture barrier
- ZIP System® wall panels with built-in **STORMEX** water-resistive barrier

ZIP System fastening & tape guides

- Allows faster, easier, more accurate installation
- Fastening guide for horizontal and vertical wall installation

ZIP System tape

- Provides moisture resistance for seams, valleys and ridges
- ZIP System tape is code recognized as window and door flashing tape when used with ZIP System wall (ESR-2227)

What Makes ZIP System Roof & Wall Advanced?

Installs faster and easier

- Installs up to 40% faster than traditional housewraps and felt¹

Eliminates rework

- Protective barriers are built into the panels, eliminating any rips or tears like those from traditional felt or housewrap
- ZIP System tape will not blow off or rip underfoot

Differentiates projects

- Job sites stand out and have a cleaner custom appearance

Peace of mind

- Exclusive 30-year limited panel warranty²

1. Based on time studies conducted by an independent third party and 2005 ZIP System builder survey.
2. Limitations and restrictions apply – see huberwood.com for details.

BUILD FASTER, EASIER AND SMARTER: ZIP SYSTEM ROOF AND WALL SHEATHING

A REVOLUTION IN ROOFING™

THE NEXT GENERATION OF WALLS™

What makes it revolutionary?

Instant Rough Dry-in for 90 Days

- Quickly cuts off water from entering your project.

Premium Moisture Resistance

- Integrated barrier provides moisture resistance if shingles are damaged or blown off in a storm.

Panel Strength and Stiffness

- Eliminates H-clips.¹
- Panels and tape lie flat under roof coverings for a consistent roofline.
- Made with same resins used in AdvanTech® flooring.

Finish Houses Faster

- No more waiting for felt installation. Schedule your subs faster and finish houses quicker.

ZIP System roof is recognized by IBC & IRC (ESR-1473) as a structural roof panel and underlayment all-in-one, FL DCA Product Approval Number 5930.

1. Do not use H-clips with ZIP System roof sheathing as they may interfere with the tape seal. H-clips are not required by code with 32/16 panels, framing at 24" o.c. maximum and total load not exceeding 80 PSF.

What makes it superior?

Code Recognized Water-Resistive Barrier

- Built-in Stormex water-resistive barrier keeps bulk water out during and after construction and eliminates the risk of water becoming trapped between housewrap and sheathing.

Type 1 Air Barrier

- Reduces air infiltration helping to maintain the R-value of insulation, promoting energy efficiency.
- ZIP System tape can help reduce air leaks as recommended by ENERGY STAR®.

Panel Breathability

- Specially engineered to allow moisture vapor to travel through the panel, allowing walls to breathe and dry out.

Structural Wall Panel

- Provides structural support and is made with same resins used in AdvanTech flooring.

ZIP System wall is recognized by IBC & IRC (ESR-1474) as a structural wall panel and water-resistive barrier all-in-one, FL DCA Product Approval Number 6565-R2.
